

## STANDARDS

- Meets ASME B16.5, B16.10, and B16.34, API 608, API 598, API 607 Rev. 5/ISO 10497
- ASME Section 8 cover/body flange connection and bolting
- Wall thickness complies with ASME B16.34
- AGA and CGA approved, regular port, threaded ends (optional) 1/2" - 12"
- Fire tested in accordance with API 607 Rev. 4/ISO 10497

# J Flow Controls 9400 Series Top Entry Valves

## FEATURES & BENEFITS

- Full port 1/2" - 10"; Regular port 1/2" - 12" threaded, socket weld, butt weld, and flanged ANSI 150 - 2500
- Seats compensate for wear and fluctuations of pressure and temperature
- Multiple solid cup and cone type PTFE stem seal or graphite packing
- Two-piece self-aligning packing flange and gland
- Stem guides in cover and gland bushing eliminate side thrust
- Longer cycle life
- Lower, uniform torque
- Live-loaded thrust washer prevents galling and provides a secondary stem seal
- Fully-enclosed spiral wound graphite filled stainless steel body gasket
- Permits in-line access for seat replacement
- Body-cover joint not affected by pipe stresses
- Can be welded into line without disassembly
- MTS reports available

## APPLICATIONS & INDUSTRIES

- All fluids
- Slurries
- Semi-solids
- Corrosive services
- Industrial
- Chemical
- Original equipment

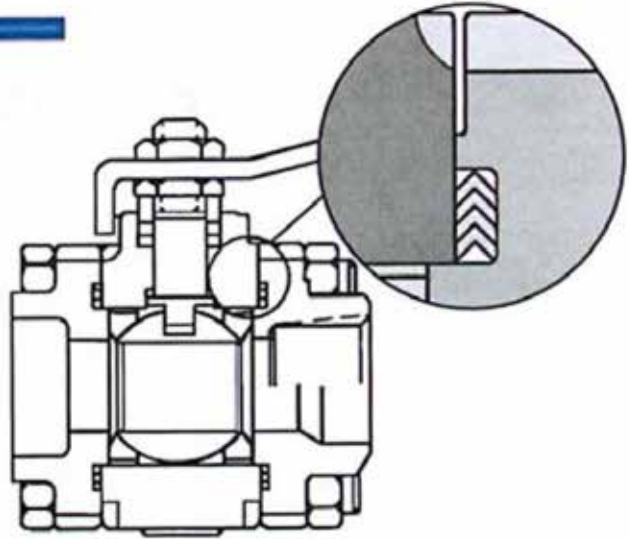

### FEATURES

#### Fire Safe Top Entry

1. Two leakage paths (gasket and packing)
2. Fully guided stem
3. In lab test 0 ppm emissions to 100,000 cycles, 500,000 with live-loading
4. Easy to weld the one-piece body into the line without disassembly. The integrity of the valve is not affected
5. All parts can be easily serviced or replaced in-line

#### Three-Piece Fire Safe Valves

1. Three leakage paths (2 gasket and packing)
2. Fully guided stem
3. Stem can wobble, cause leakage
4. Greater emissions, lower cycle life
5. Welding can affect the integrity of the valve due to tendency to separate the three-bolted body parts during the welding
6. Valve can not be serviced in-line, because the fire safe design with spiral-wound gaskets requires internal guiding of the two end pieces. The guiding prevents the centerpiece from swinging out.

# 9400 Series Top Entry Valves

## TORQUE CHART (CLEAN SERVICE) TE-600 1/2" - 6"

## MAXIMUM DIFFERENTIAL PRESSURE TEMPERATURE RATINGS

- Stainless Steel (CF8M)

- Carbon Steel (WCB)

(1) Body rating is per B16.34 pressure/temperature ratings, except for 2" full port and 2" regular port, which are limited to 1200 psi at 100°F, 3" and larger full port and 4" and larger regular port are rated Class 300 only. Shutoff pressure for valves is limited to the differential pressure as shown on the graphs.  
 (2) For full B16.34 ratings and/or shutoff against full B16.34 differential pressures consult factory.
